Gentlemen:

Re: United States Steel Corporation
Gary Works
NPDES Permit No. 0000281

For samples collected on January 16, 1978, for outfall 034
(Gr-L7), our analysis indicates a chromium concentration of 0.63 mg/l.

We have investigated this matter and have been unable to
establish a definite cause.

Subsequent sampling indicates a chromium concentration of
less than 0.05 mg/l which is within compliance.

Very truly yours,

G. J. Behrens
